The heaviest raw acid fuzz madness in 30 years, very extreme and very psychotic '69 freak-out acid-fuzz drug rock psychedelia. This is their never released second album that came from the psychedelic sessions during the recordings of Homo Erectus. It's the same raw and energetic Blue Cheer sound, but with very extreme bad-acid-trip drug rock versions of Sunshine Of Your Love (Cream), Speed (Ron Allen Light Show), Demon's Eyes (Deep Purple) and Ruler Of The Universe (Terry Brooke's Strange). The full 15 minutes of sitar, tablas, sectarian cult-choir vocals, endless crazy guitar freak-out solo-ing and the excessive use of never ending self-oscillating echo, flanger, phaser and delay effects. If you want to feel HELL, if you want to talk with GOD, if you want to be together with SPACE, this record will help you, DEFINITELY! ---burningworldrecords.com
