Most blues/blues rock bands I've heard live sound so much better live than on live recordings that it's usually very disappointing when you hear their CD efforts. I've never seen Jimmy Thackery and the Drivers live, but if the same holds true for this CD as most I hear, then they must be one hell of a live band. This is quite simply the best live album I've ever heard! Close you're eyes and you'd believe you were at the gig. The energy and enthusiasm of the band make this one of the most enjoyable gigs I've ever heard - right up there with the best of Albert Collins and James Cotton. ---M. Mason, amazon.com
