The Swedish duo of Baba Blues is famous for on stage sounding like a whole big band going on with the minimalistic settings of voice, harmonica and two acoustic guitars put into a PA-system.

No faking machines or synthesisers, just pure handmade music...

When they make records they use a little more of technique and instruments as they make them for a different audience and listening situation.

“Deep down in the mirror” was released in 2005, with expressive lyrics, experimental settings (kora, violin and brass arrangements) and together with heavy touring they recieved the Swedish Blues Award of Jefferson Bluesmagazine in 2006. ---babablues.se
