Adam Harasiewicz – piano

Chopin is the true inventor and patron of the "étude de concert" and what separates Chopin's Etudes from similar compositions is that it was Chopin who first gave etudes complete artistic form in which musical substance goes hand in hand with technical challenge.

The creative stimulus for Chopin's etudes is the individually shaped hand, with its arrangement of muscles and tendons. In essence, it is the mechanical difficulty that directly produces the music, its charm and its pathos. ---pianosociety.com
