Node Records has released a soundtrack album for the History original series Project Blue Book. The album features selections of the show's original music composed by Daniel Wohl (Search Party, The Stand In, Shangri-La, They'll Love Me When I'm Dead). The soundtrack is now available to stream/download on Amazon and other digital music stores. Project Blue Book is created by David O'Leary and stars Aidan Gillen, Laura Mennell, Michael Harney, Ksenia Solo and Michael Malarkey. The drama executive produced by Robert Zemeckis is based on the true, top-secret investigations into Unidentified Flying Objects (UFOs) and related phenomena conducted by the United States Air Force from 1952 to 1969.
