There were 2 shows this night. I'm not sure which show this one is, but it is the only one I have of this edition of the Jan Garbarek Group. I did not see this show. etree lists this as from Jonathan Swift's, but the source of it, the sound of it, and my memory of it all say this concert was at Nightstage. So the sound is really nice, this one doesn't have any problems in the recording. There's a lot of Jan Garbarek shows to be heard, he goes back to early 70's, but there were only 2 shows listed in etree for 1987 (this was one of them, but didn't have a setlisting.)

I have also made some simple artwork for this one from a commercial release around the same time period and have included it with this download. This is just an excellent capture of a Jan Garbarek Group show from this era. Just simply wonderful music played to near perfection by outstanding musicians.
