IKV takes me back to the 70s glory days of horn-laden funk & soul. To me, IKV is an eclectic mix of Earth, Wind and Fire, Parliament and Funkadelic, with some modern rap insertions here and there. You might also think the incredible Phenix Horns were back, this time assisting IKV with their arrangements! The result is wonderfully pleasant. Each tune on this disc is worth a listen, with the possible exception of "Demolición." I understand the disc is hard to find. Nail one down whenever you get an opportunity -- you won't regret it! ---Dave Huber, amazon.com
