Jose Monge, known as Camaron de la Isla (the Shrimp of the Island), had a natural gift. He could make his voice sound stressed and distressed without shredding his vocal cords. This talent gave him the physical basis for singing the heartbreak and outrage that is flamenco. This voice is, of course, the first thing you notice on this disc. The second thing is the poor recording. It's strange, because the performances don't sound amateurish, but the sound does. The liner notes contain no information about the session, except that it dates from 1971, but the explanation is probably that the recording was made at a "juerga," or jam session that was recorded with a cheap tape recorder. I don't believe anything was

done to salvage the quality (some digital post-processing) The saving grace of the CD is its passion, which I know I've said often in this review but it is almost palpable. I will check out other CD compilations and perhaps refer you to one of them. --- Rhesus Ortega, amazon.com
