Pink Floyd's concert at San Francisco's famed Fillmore West is one that most collectors, even casual fans, have in their collections. The quality is excellent and the performance is its equal, the Floyd certainly shared a common vision with the psychedelic West Coast music community that inhabited the Bay Area. By spring 1970 the band had settled nicely into a group of songs that would, for the most part, form the basis of their live sets for throughout 1971. Like many I love these years, the Space Rock themed explorations enhanced with subtle mood nuances powered by incredible musicianship from all four Floyd's make for some of the most invigorating listening one can find. Needless to say, material from these years takes up a bit of space on my shelves and is steadily taking over! ---collectorsmusicreviews.com
