Formed 1981 in Cologne, Breslau was probably (one of) the first German metal bands to sing in their mother tongue. "Volksmusik" was released in 1982, showing a band with a raw and direct style. Unfortunately, they were unjustly accused of right-wing ideology and of using Nazi imagery, which led to bad, negative press, something that would ultimately destroy the band's promising career, with front-shouterin Jutta Weinhold leaving the group shortly after the release of their debut (and only) album. 10 cool metal/punk Songs and they are still rockin'. --- wilddevilrules.blogspot.com
