Australia never was a prolific land for AOR bands, but some good outfits come out from the land of Oz. Safire is one of 'em, they play an infectious melodic hard rock / AOR music. This 6 track only CD keep you interested from start to finnish, with catchy songs. Great production for an indie release, now out of print and very hard to find original. Give this a listen, you will love it. ---hardrockaorheaven.blogspot.com
