"Live" albums are a tricky affair. Naysayers are quick to point out that they are marketing ploys for record companies to scupper more money from the pockets of fans. "Live" albums do give fans something to hype about while artists buy more time working on their next project. And there is some grain of truth in this: some live albums are nothing more than re-recordings of the artist's studio efforts with the audience clapping sandwiched in between songs. Moreover, the cards fall even farther away from favor when the artist only has one studio album. So, is the live album completely a carbon copy of their studio counterpart with a few augmentations? Before we investigate for King & Country's latest live effort "Hope is What We Crave for: Live," it is prim and proper to say a word about this duo. Joel and Luke Smallbone are siblings born in Australia but moved to Nashville when they were younger. They are also brothers to Contemporary Christian artist Rebecca St. James. Named after the English battle cry "for King and Country," these Aussie brothers are determined to live out Psalm 20:7: "Some trust in chariots and some in horses, but we trust in the name of the LORD our God." --- Timothy Yap, breathecast.com
