This copy of the legendary vinyl bootleg "Killing Yourself To Die" is a really brilliant piece of work. Soundquality as good as on the vinyl and great artwork as you can see leaves only one main difference between the vinyl and the CD: the price! Like "The Ray Gillen Years" this CD was released by Bondage Music in Japan somewhere back in 1995! Everyone should check out the exciting version of "Gypsy". :::: Lund '77 is the finest quality specimen of a complete TECHNICAL ECSTASY era show in circulation.

There has been some debate as to whether this show is an audience recording or from an FM broadcast. The stunning clarity and well-balanced mix would convince many that it may have been professionally recorded. In fact, it was recorded with a Nakamichi tape deck and 2 microphones. It's true origin becomes more evident when you hear some clapping fairly close to the microphones. Also, Ozzy's vocals are a bit more distant than one might expect them to be on a soundboard or FM tape.
