The Essential Richie Kotzen is a career retrospective collection encompassing Kotzen's impressive career and includes his most essential work. The two-CD package is made up of classic Kotzen material, acoustic performances, bootleg material, and the brand new songs "War Paint" and "Walk With Me." A DVD is also a part of the packaging - bursting with music videos, acoustic performances, and bootleg material here too. Later this month, fans will be able to hear a sneak-peek of this new mammoth release as a three-song sampler (which includes the two new songs) will be serviced to rock radio stations.

Regarding the two new tunes, "War Paint," with its blusey intro, "...was a challenge to make a studio recording sound like a live band with only one musician playing all the instruments. I think I accomplished that on this track."

And as far as "Walk With Me": "There was a specific sound I was hearing in the song. I realized it was a Theremin, so I bought one. I spent a couple of weeks learning it. I used that where the lead guitar would normally go. It was a really rewarding departure for me."
