I've seen this man on many occasions and been impressed with his prowess as both guitar player and singer with the Blues Breakers as the "warm up" band for John Mayall and also as the foil for John Mayall as the main attraction.

But let's forget the John Mayall connection and listen to this album for what it really is - a great blues album - showing the various forms in which this genre of music manifests itself, maxed by a man who lives and breathes the blues.
